THERMOLUMINESCENCE AND ELECTRON-SPIN-RESONANCE DATING

Part I—Methodology and Archaeological Applications

	VII	Papers published in *Quaternary Science Reviews* Volume 7, Nos 3/4
P. D. Townsend	1	Editorial
Section I: Invited Review		
D. W. G. Sears	5	Thermoluminescence of meteorites: shedding light on the cosmos
Section II: Spectral Studies		
R. A. Akber, G. B. Robertson and J. R. Prescott	21	The 100°C thermoluminescence emission from high-fired ceramics: a three dimensional view
D. J. Huntley, D. I. Godfrey-Smith, M. L. W. Thewalt, J. R. Prescott and J. T. Hutton	27	Some quartz thermoluminescence spectra relevant to thermoluminescence dating
J. Chee, H. L. Oczkowski, Y. Kirsh, A. Scott, W. O. Siyanbola and P. D. Townsend	35	TL spectra of natural zircons
Y. Kirsh and P. D. Townsend	43	Speculations on the blue and red bands in the TL emission spectrum of albite and microcline
I. J. M. Al-Khalifa and S. A. Durrani	51	Thermoluminescence emission spectra of mineral epidote
M. L. Dalal, Y. Kirsh, H. M. Rendell and P. D. Townsend	57	TL emission spectra of natural feldspar
H. M. Rendell, S. J. Mann and P. D. Townsend	63	Spectral measurements of loess TL
Section III: TL Characteristics of Minerals		
X. H. Yang and S. W. S. McKeever	75	Characterization of the pre-dose effect using ESR and TL
W. F. Hornyak and A. D. Franklin	81	Single level isothermal TL-decay (with energy level distribution and retrapping)
G. Kitis and S. Charalambous	91	Thermoluminescence response as a function of irradiation temperature
S. A. Durrani and M. S. Khalifa	97	The effect of radiation damage on the thermoluminescence properties of mineral sphene
N. Kristianpoller, Y. Kirsh, S. Shoval, D. Weiss and R. Chen	101	Thermoluminescent properties of mica
M. B. M. Hochman and P. J. M. Ypma	105	Changes in the artificial thermoluminescence glow curves of quartz associated with uranium deposits
E. H. Haskell, P. L. Kaipa and M. E. Wrenn	113	Pre-dose TL characteristics of quartz inclusions removed from bricks exposed to fallout radiation from atmospheric testing at the Nevada test site
I. J. M. Al-Khalifa and S. A. Durrani	121	Phototransfer-thermoluminescence (PTTL) characteristics of mineral epidote
Section IV: Fading Studies		
D. Stoneham and M. B. Winter	127	The removal of anomalous fading in authenticity samples
S. G. E. Bowman	131	Observations of anomalous fading in maiolica
P. A. Clark and R. H. Templer	139	Dating thermoluminescence samples which exhibit anomalous fading

H. Y. Göksu, D. F. Regulla, A. Vogenauer and A. Wieser — 143 Dose dependent TL fading of obsidians

S. Tyler and S. W. S. McKeever — 149 Anomalous fading of thermoluminescence in oligoclase

D. C. W. Sanderson — 155 Fading of thermoluminescence in feldspars: characteristics and corrections

R. Visocekas — 163 Comparison between tunnelling afterglows following alpha or beta irradiations

Section V: TL Measurement Systems

I. K. Bailiff and E. J. Younger — 171 Computer-controlled TL apparatus

L. Bøtter-Jensen — 177 The automated Risø TL dating reader system

N. Vana, R. Erlach, M. Fugger, W. Gratzl and I. Reichhalter — 181 A computerised TL read out system for dating and phototransfer measurements

Section VI: Dosimetry

L. Bøtter-Jensen and V. Mejdahl — 187 Assessment of beta dose-rate using a GM multicounter system

D. Miallier, H. Erramli, J. Faïn and S. Sanzelle — 193 Dose-rate measurement by the enclosure method using Al_2O_3 TL dosimeters

G. Kitis and S. Charalambous — 199 Behaviour of TL-dosimeters irradiated at various temperatures

D. C. W. Sanderson — 203 Thick source beta counting (TSBC): a rapid method for measuring beta dose-rates

S. Sanzelle, H. Erramli, J. Faïn and D. Miallier — 209 The assessment of gamma dose-rate by gamma-ray field spectrometer

P. L. Kaipa, E. H. Haskell and G. H. Kenner — 215 Beta dose attenuation and calculations of effective grainsize in brick samples

C. Goedicke — 219 Determination of natural uranium and thorium content by alpha spectrometry

J. R. Prescott and J. T. Hutton — 223 Cosmic ray and gamma ray dosimetry for TL and ESR

Section VII: ESR Studies

M. Barabas, A. Bach and A. Mangini — 231 An analytical model for the growth of ESR signals

R. Grün, H. P. Schwarcz and J. Chadam — 237 ESR dating of tooth enamel: coupled correction for U-uptake and U-series disequilibrium

R. G. Lyons, G. A. Bowmaker and C. J. O'Connor — 243 Dependence of accumulated dose in ESR dating on microwave power: a contra-indication to the routine use of low power levels

T. Miki, A. Kai and M. Ikeya — 253 ESR dating of organic substances utilizing paramagnetic degradation products

Li Hu Hou — 259 Properties of thermoluminescence (TL) and electron spin resonance (ESR) in deposited carbonates

P. De Cannière, R. Debuyst, F. Dejehet and D. Apers — 267 ESR study of internally α-irradiated (^{210}Po nitrate doped) calcite single crystal

R. G. Lyons — 275 Determination of alpha effectiveness in ESR dating using nuclear accelerator techniques: methods and energy dependence

Section VIII: TL Dating of Archaeological Materials

Lu Yanchou, Zhang Jingzhao, Xie Jun and Wang Xueli — 283 TL dating of pottery sherds and baked soil from the Xian Terracotta Army Site, Shaanxi Province, China

L. Benkő and I. Bognár-Kutzián — 287 Investigation of two Copper Age cultures by means of TL dating

R. Erlach and N. Vana — 295 TL-dating of archaeological samples from Carnuntum

G. B. Robertson and J. R. Prescott 299 The Thai Ceramics Archaeological Project: TL characteristics of the artifacts

D. C. W. Sanderson, F. Placido and J. O. Tate 307 Scottish vitrified forts: TL results from six study sites

K. Strickertsson, F. Placido and J. O. Tate 317 Thermoluminescence dating of Scottish vitrified forts

M. Schvoerer, M.-C. Delavergne and R. Chapoulie 321 The thermoluminescence (TL) of Egyptian Blue

R. H. Templer and B. W. Smith 329 Auto-regenerative TL dating with zircon inclusions from fired materials

J. Faïn, D. Miallier, M. Montret and S. Sanzelle 333 Zircon dating: regeneration and evaluation of the external dose

M. Martini, E. Sibilia, T. Calderon and F. Di Renzo 339 Spurious thermoluminescence in archaeological ceramics: a study of affecting factors

Section IX: Statistical Analysis

E. M. Scott and D. C. W. Sanderson 345 Statistics and the additive dose method in TL dating

A. Bluszcz 355 The Monte-Carlo experiment with the least squares methods of line fitting

R. G. Lyons 361 A simple statistical method for the comparison of accumulated dose in ESR dating

New Patents i

Volume 14 Number 3

H. Y. Göksu, S. J. Pennycook and **L. M. Brown** 365 Thermoluminescence and cathodoluminescence studies of calcite and MgO: surface defects and heat treatment

A. D. Belyaev, Z. S. Bikbova, V. L. Gayshan, P. K. Khabibullaev, V. I. Kogan, V. P. Pikul and **A. M. Usmandiarov** 369 The ion track etching rate in crystal track detectors

P. M. Stafford, J. L. Horton, K. R. Hogstrom, P. M. DeLuca, Jr and **D. Holslin** 373 The critical angle dependence of CR-39 nuclear track detectors for 3–10 MeV protons and 7–15 MeV alpha particles

R. Rachlitz, S. Gärtner and **J. Holze** 379 On the description of the process of recording TiB_2 particles on solid state nuclear track detectors by the use of neutron-induced autoradiography

R. Gold, J. H. Roberts, L. S. Kellogg, W. Y. Matsumoto, W. N. McElroy, C. C. Preston, R. L. Simons and **S. R. Bierman** 387 Reaction rate measurements for nuclear reactor analyses and criticality data

Short Communications

A. K. Singh, R. K. Jain, J. Ramarao, S. K. Bose and **K. K. Dwivedi** 409 Detection of ^{238}U ions using Makrofol plastic track detector

C. Furetta 413 New calculations concerning the fading of thermoluminescent materials

Conference Report

M. Sohrabi 415 The Sixth Symposium on Neutron Dosimetry

New Patents i

Volume 14 Number 4

R. L. Fleischer 421 Radon in the environment—opportunities and hazards

R. L. Fleischer 437 Nuclear track studies of alpha-recoil damage in nature: relation to isotopic disequilibrium and leaching of radionuclides

J. Charvát and **F. Spurný** 447 Optimization of etching characteristics for cellulose nitrate and CR-39 track detectors

J. Charvát and **F. Spurný** 451 Etching characteristics of cellulose nitrate and CR-39 after high dose electron irradiation

A. Tidjani 457 Study of the effects of atmospheric parameters on ground radon concentration by track technique

T. Sawamura and **H. Yamazaki** 461 Etched-hole formation in LR-115 cellulose nitrate detector irradiated with fast neutrons

G. E. Gold, R. Gold, J. H. Roberts and **C. C. Preston** 467 Annealing of alpha particle tracks in cellulose nitrate

M. Kasuya and **C. W. Naeser** 477 The effect of α-damage on fission-track annealing in zircon

Conference Report
C. M. H. Driscoll 481 Forum on the Science and Techniques of Solid State Dosimetry

Book Review
D. O'Sullivan 483
